Partner FAQ

Partner FAQ Document

Q1: What partnership program should I choose as an Independent Software Vendor (ISV) looking to integrate or extend SAP SuccessFactors with my own?

A: You should apply for the SAP PartnerEdge OpenEcosystem – Build Partner program. Apply for the program [here](#).

Q2: How do I get my S-User ID?

A: You can get your S-User ID by applying as a SAP PartnerEdge OpenEcosystem – Build Partner. This ID is necessary for starting your SAP Discovery Center mission journey.

Q3: How do I start the mission via SAP Discovery Center?

A: Once you have completed the onboarding with the SAP PartnerEdge OpenEcosystem – Build program, start the mission that is specific to SAP SuccessFactors Build Partners "Build SAP SuccessFactors Extensions as an SAP Partner".

Q4: What is the difference between SAP PartnerEdge – Build (PE Build) and SAP PartnerEdge OpenEcosystem-Build (OE Build)?

A: OE Build is the starting point for Independent Software vendors which helps them by providing S-User access to SAP Help materials and various portals. Once you have built the integrated solution, it's time to switch to PartnerEdge Build for additional benefits.

Q5: How does the Integration feasibility assessment happen?

A: After you start the "Build SAP SuccessFactors Extensions mission", you will be asked to submit a vetting questionnaire. The SAP SuccessFactors product team reviews the answers and provides the assessment via the mission cards.

Q6: What materials should I follow to build the Integration as a SAP Partner?

A: SAP SuccessFactors Implementation Design principles have to be followed to build the integration correctly.

Q7: Where should I check for questions related to Non-Commercial Licenses?

A: Please check the FAQ [here](#).

Q8: What are the various portals that SAP SuccessFactors Partners need to be aware of?

A: SAP SuccessFactors Partner Delivery Group (PDG) for technical questions, SAP Improvement Finder for posting improvement ideas/requesting enhancements, and SAP Road Map Explorer for understanding the roadmap.

Q9: What are the advantages of starting the mission and building the integration versus building the integration on my own?

A: Starting the mission assigns an SAP Coach who provides SAP SuccessFactors Product advice, allows you to conduct solution walkthroughs with SAP Coach and get feedback, provides early insights into product overlaps, and ensures product standards are followed.
